

# Surface repair by Microsoft Authorized Service Providers

Article • 01/27/2023 • 2 minutes to read • Applies to: Windows 10, Windows 11

As part of our commitment to provide great service and support to all our customers, we're building a great network of authorized service providers (ASPs) to help repair and service your Surface devices. ASPs work closely with Microsoft to help resolve issues that may occur with your Microsoft devices. ASPs perform repairs on behalf of Microsoft, have direct access to Microsoft support, and use genuine Microsoft parts.

## Global ASP network

The growing ASP network consists of more than 160 locations.
